

technologies, for example integrating neural and symbolic techniques to build AI that can perform more complex tasks by understanding and reasoning more like humans.

*Business transformation and hybrid cloud services* provide a \$300 billion market opportunity. Key to how our technology is delivered, IBM Global Business Services (GBS) is a leading design, consulting and systems integration organization, with more OpenShift certified experts than any of the competition. They are the leaders in helping enterprises move workloads onto OpenShift – the top hybrid cloud platform – and have built or migrated hybrid cloud applications for more than 500 clients.
